TRI-MACH Group Inc.

“Your One Stop Solution Provider”
Our Mission is to Create an IMPACT

**Integrity**
Carry out all tasks with complete dedication to excellence and food safety.

**Motivation**
Encourage our people to explore new practices and technology to foster innovation and maintain a competitive edge.

**Professionalism**
Uphold the highest standards of quality in everything we do.

**Attitude**
Maintain a positive approach demonstrating respect and fairness towards our associates, clients, community and the environment.

**Commitment**
Dedicated to delivering maximum value and responsive service to our clients.

**Teamwork**
Work in partnership with our customers to achieve the highest level of success.
Since 1985, Tri-Mach Group has been an industry leader in the food, beverage and pharmaceutical industries. With a corporate headquarters in Elmira, Ontario, and other locations in North America, Tri-Mach Group is a full service multi-trade solution provider ready to meet any manufacturing, facility upgrade or equipment integration need.

We are committed to providing our customers with highest-quality sanitary stainless steel equipment on the market, combined with best-in-class service. As your one-stop solution provider, we offer a comprehensive suite of services, including millwrighting, electrical, stainless steel fabrication, design engineering, custom machining, packaging automation and more. Our experienced management team and tradespeople are passionate about what they do, and their top-quality craftsmanship reflects this passion.

The Tri-Mach Group name is built on dependable service, hard work, dedication, and the innovation required to meet the demanding challenges our customers face. Our reputation is the key to our ongoing success, working locally, nationally and internationally.

Conveyors

Tri-Mach Group is a leader in manufacturing custom sanitary conveying systems for the food, beverage and pharmaceutical industries.

Each conveyor is custom-designed and built to your specifications from concept to finished product. Our food-grade conveyors meet or exceed the highest standards in health and safety requirements for all areas of food processing. The expert team at Tri-Mach Group can also modify your existing conveyors to improve established sanitation processes.

General Design Specifications

- Constructed using all grades of stainless steel (304, 304L, 316)
- All welds are continuous and smooth, free from burrs and pits
- Stainless steel or fiberglass enclosures
- Belting suited to application
- Stainless steel gearboxes and motors
- AC or DC drive controls
- Fixed or variable speed
- All systems are fully wired and tested

The Ever-Kleen® Conveyor System

The Ever-Kleen® brand represents the very best in sanitary equipment design. Built to be food-safe, ergonomically sound and simple to disassemble and clean, Ever-Kleen® conveyors are a state-of-the-art solution for moving products along your processing or packaging line.

Ever-Kleen® Design Features

- Tool-less design for conveyor disassembly in minutes
- All mounted components stood off the frame
- All stainless steel sanitary foot pads and/or stainless steel castors
- All welds continuous and smooth, free of burrs and pits
- All conveyor components constructed using food approved plastics
- Removable rollers, side guides and wear strips
- Self-draining wash through frame
- All stainless steel angle frame construction (no hollow tube)

Ever-Kleen® Benefits

| Sanitary design, built to eliminate bacteria harborage areas | Complies with NAMI, 3A, HACCP, NSF-GFTC, GFSI and other food safety standards | Suitable for all belting types |
| Customized to meet your specific requirements, ensuring seamless line integration | Tool-less disassembly design saves hours of downtime each day | Easy integration with optional CIP and belt-lift systems |
As Easy As 1-2-3!

Our Ever-Kleen® Conveyor Systems disassemble within minutes, without the use of tools, providing increased productivity, reduced downtime and the highest level of food safety.

Optional Lift Bar
- Ideal for conveyor lengths 20’ or longer
- Eliminates the need to remove belt for sanitation
- Allows easy access to all conveyor components
- Reduces downtime and increases productivity

Optional CIP Spray Bar System
- Allows cleaning of the belt without disassembling conveyor
- Quick connect cleaning port eliminates the need for tools
- Prevents bacterial growth on belt surface
- Increases productivity by reducing sanitation downtime
The Ever-Kleen® SL Series

Tri-Mach Group is proud to offer a three-level benchmark system for our industry-leading Ever-Kleen® conveyors. The Ever-Kleen® SL1, SL2 and SL3 series conveyors were developed to meet every aspect of our customers’ needs.

By re-organizing our Ever-Kleen® conveyor offerings, Tri-Mach Group is providing more choice, higher efficiency, and improved economical flexibility for our valued customers. The new Ever-Kleen® levelling system streamlines the design and fabrication process, while maintaining the same level of customization and quality that our customers expect from a Tri-Mach Group solution.
## Ever-Kleen® SL Series Advantages

- Increased cost-effectiveness by streamlining design & fabrication process
- Improved ease of choice with application-based material & design templates
- Seamless integration with new or existing equipment through custom dimensions & functionality
- Exceptional end-to-end service: design, fabrication, assembly & installation by our HACCP-trained team
- Same level of customization that our valued customers expect

Ergonomic Stands

Ever-Kleen® Ergonomic Stands are the perfect addition to any facility where food safety and employee wellbeing are top priorities.

The stands are sanitary in design, featuring stainless steel construction, slip-resistant decking with cushion and flex for employee comfort. Durable and custom-built for any application, our Ever-Kleen® Ergonomic Stands allow employees to work at their proper ergonomic height, increasing productivity and well-being.

If needed, Tri-Mach Group can include laser-cut RAW/RTE/PKG labels into the stands for designation in specific areas in your facility.

Stainless Steel Fabrication

From single components to complete line layouts, Tri-Mach Group has the proven expertise to deliver a project of exceptional quality.

Our highly skilled team will work closely with you to engineer and manufacture custom equipment to perfectly fit your needs. We use the latest in manufacturing technology and techniques to produce the highest level of quality products.

Tri-Mach Group is proud to use only non-ferrous materials, such as aluminum and stainless steel, in our facility. By reducing exposure to ferrous particles, our equipment is less likely to rust and contaminate food.

Machining

In our fully-equipped machine shop, we complete customer-specific projects that demand an eye for detail and minute precision.

Larger projects are completed in collaboration with other Tri-Mach Group divisions such as Fabrication, Engineering and Millwrighting. Our expert machinists have vast experience with a wide range of materials, using the latest technologies in lathes and milling machines. Their knowledge and expertise allow us to create custom components for any equipment in the food, beverage or pharmaceutical industries.

Our Quality Assurance Guarantee

Product quality is our top priority

We employ highly-skilled and experienced machinists

We carry out detailed inspections and testing

We implement strict quality control procedures

We provide fast and reliable service to meet your needs

We are experts in food-grade materials

Tooling
Backing up our sanitary equipment offerings, Tri-Mach Group also provides a full suite of millwrighting services to provide a true one-stop solution experience.

Our CWB and HACCP certified millwrights and welders have earned a reputation for being the best in the industry.

Providing best-in-class millwrighting services since 1985, Tri-Mach Group prides itself on our attention to detail on every project, while always respecting our customers’ schedules. With millwrights available 24 hours a day, 7 days a week, we can complete your project on time or ahead of schedule so you can get back to business as soon as possible.

Photo-eye automation for an Ever-Kleen Bacon-veyor bacon processing line

Tri-Mach Group can design a custom HMI for your unique workflow.

Electrical work performed by licensed electricians and electrical contractors, including Tri-Electric Solutions Ltd., ECRA/Licensed Electrical Contractor #7000938
Streamline your operations with turnkey automation solutions from Tri-Mach Group, seamlessly integrated with your existing equipment.

Leveraging our industry knowledge and expertise, our engineering and project management teams define and select the control components required to deliver a custom-engineered system. No matter how complex the need, Tri-Mach Group implements solutions that are easy to use, maintain and modify, meeting or exceeding customers' expectations.

Packaging Automation

Our automation services are perfect for improving end-of-line processes. Designed to streamline the packaging process while providing a lucrative ROI, packaging automation services from Tri-Mach Group are custom-built to integrate seamlessly with your existing equipment.

Design Engineering

Tri-Mach Group’s in-house design engineering team uses the latest Solidworks, Autodesk® Inventor® and CAD technology to accurately conceptualize and design the optimal solution for your operation’s needs.

Our design engineering specialists have years of design and field experience in the food, beverage and pharmaceutical industries. Each design is produced to meet or exceed CFIA, USDA, NAMI, 3A and BRC sanitary design guidelines.
Our Capabilities Include:

<table>
<thead>
<tr>
<th>Solidworks, Solidworks Simulation, Autodesk &amp; AutoCAD technology</th>
<th>3D Animations</th>
<th>Conceptual Layouts</th>

Preliminary consultations are set up to define your project’s specific needs. Tri-Mach Group will then use our 30+ years of experience to design a solution that works for you – without the hidden costs that can slow down negotiations. Not only does this facilitate a smooth transition from project conceptualization to finished product, but it also helps build trust between us and the valued customers we help.

Prototyping / Research & Development

With an array of prototyping services at your fingertips, your next solution can be something the market has never seen before. Tri-Mach Group is ready to provide you with best-in-class services to help make it happen.

General Contracting

From building expansions to additional processing lines, choose Tri-Mach Group as the General Contractor to oversee your next construction project.

Tri-Mach Group will provide on-site supervision, and our team of skilled tradespeople will ensure all aspects of construction are completed to the highest of standards. Our experienced project managers will provide complete project pricing along with a detailed work schedule, ensuring the project is completed on time and on budget.

- Certified Millwrights
- On-site Coordination
- Safety Inspections
- Active Resource Management
Project Management Support

Since 1985, our project managers have been offering advice on project goals, corporate strategies, resource management, as well as managing cross-functional project teams, including international suppliers of equipment.

Our project management team possesses a vast understanding of the food, beverage, and pharmaceutical processing industries, and this knowledge is complemented with first-hand experience of in-field project management complexities. Our Project Management Professionals will ensure your project is completed on time and on budget.

Certified Tri-Mach Group millwrights oversee the decommissioning of a valued customer’s equipment.

Tri-Mach Group employees build a wall for a valued customer’s new cheese processing facility, part of a complete General Contracting project.

Tri-Mach Group millwrights remove piping as part of a plant decommissioning project for a valued customer.

A Tri-Mach Group Foreman performs a safety and integrity inspection on newly-installed equipment.

Tri-Mach Group coordinates the construction of a new facility for a valued customer.

Tri-Mach Group certified millwrights install a freezer in a valued customer’s facility.
Regular maintenance can save time and money by reducing major repairs and unscheduled downtime, while also helping to prevent food contamination of food products. Tri-Mach Group has the experience and expertise to ensure your operation continues to run efficiently 365 days a year.

Our maintenance professionals offer 24/7 support and have been trained on all types of manufacturing equipment. In addition, each Tri-Mach Group employee has received in-depth HACCP and GFTC training and follow GMP food safety guidelines.

**Belt Repair & Spare Parts Program**

When a critical component needs to be repaired or replaced, trust Tri-Mach Group to quickly get your equipment back up and running. Our fully-equipped machine shop can create new components for your equipment, and our extensive list of industry contacts allows us to take care of any issue you might be experiencing. **Tri-Mach Group is the exclusive on-site service provider for Intralox belting in Ontario, Canada.**

**Conveyor Supply, Install & Repair**

Our expertise doesn’t stop with just supplying our own conveyors. Tri-Mach Group can inspect, repair, or retrofit any conveyor in your facility. If you’re experiencing efficiency issues, mechanical failures, electrical problems, or anything else that impedes production, trust the experts at Tri-Mach Group to bring your equipment back to acceptable standards.

Our experienced Project Managers will visit your facility to inspect the equipment and generate an estimate for repair. For improved efficiency, Tri-Mach Group millwrights can perform upgrades on-site or at our facility. Once complete, we will re-install the equipment and perform a thorough Factory Acceptance Test to ensure the solution is up to your standards.
